A. Preface

Skill Explained:

A hairdresser generally works in the commercial sector, offering a range of services and treatments to the hair for individual clients. Hairdressing is closely associated with other parts of the service sector, and with the many products that support it, normally for commercial purposes.

Hairdressing also has an important therapeutic role in supporting individuals' self-esteem and confidence. It also helps to relieve the effects of illness, and can aid recovery.

He or she may offer a wide range of services, including cutting, coloring, styling, chemical reformation, and special hair treatments. Whatever the structure of the work, the trained and experienced hairdresser takes on a high level of personal responsibility and autonomy, from safe working, to achieving exceptional effects for special occasions.

For the talented hairdresser there are many commercial and international opportunities; however, these carry with them the need to understand and work with diverse cultures, trends, and hair types.

Eligibility Criteria (for IndiaSkills 2018 and WorldSkills 2019):

Competitors born on or after 01 Jan 1997 are only eligible to attend the Competition.

Total Duration: 4 Hrs

C. Marking Scheme

The Assessment is done by awarding points by adopting two methods, Measurement and Judgments

- | | | |
|----------------|---|--------------------------------|
| 1. Measurement | - | One which is measurable |
| 2. Judgments | - | Based on Industry expectations |

Aspects are criteria's which are judged for assessment

Measurement is used to assess accuracy, precision, and other performance which can be measured in unambiguous way. Mark is awarded in full for a dimension within tolerance and zero when it is out of tolerance.

Judgment is used to assess the quality of performance, about which there may be small differences of opinion.

The scores from 0 to 3 are awarded for conformity with industry standards (score 1 stands for 1/3 and score 2 for 2/3 of the maximum mark allotted for the criterion).

Example-Judgment Marking

If maximum marks for Judgment criteria is 1 and if all 3 Experts (Juries) give 3 points to a candidate, the candidate will get 1 mark for that aspect. If 2 Experts give 3 and 1 Expert gives 2 points, then candidate will get $(3+3+2)/9*1 = 0.89$ marks for that aspect out of 1 mark.
